

KYLE SCHERTZING

I am running for re-election to the Uptown Planners as a citizen architect, an associate at a locally renowned architecture firm, and a progressive community member whom is deeply energized by the great history and potential of San Diego. Having invested nearly a decade of my life, working and learning from European architecture and urban planning, I feel very fortunate to share my knowledge with the Uptown Community. Over the next 4 years I will be a progressive advocate for community projects that promote health and well-being through holistic design, provide accessibility to patrons from all walks of life, and intelligently aid in addressing housing opportunities for those who need it most.

The Maple Canyon storm-water management, Normal Street DMV, 6<sup>th</sup> & Olive tower, and Normal Street Promenade projects are some of our most unique opportunities for the betterment of the Uptown Community that I have reviewed. I will continue to listen to both sides of the projects we see in the future, provide technical feedback when needed, and advocate for smart community growth.

I am humbled by this opportunity thus far and will strive to help the Uptown Community flourish.
